

SCENTCOMMUNICATION

Scense

The SCENTCOMMUNICATION Scense is made of brushed aluminum and is a design alternative to Scentcommunication's Scentcube, another system from our product line. Optimized air flow designed by Airbus engineers takes the scent delivery to perfection. The ScentGel cartridge technology of the system allows a powerful, high-quality, long-lasting, discrete and healthy scent experience.

Compared to usual ambient scenting systems (mostly liquid-based) the Scense allows scent branding and dispenses the scent of your choice in the room in a clean and cost-effective way. The Scense can be positioned in public areas thanks to the simple locking system, the aluminium housing and the reduced dimensions. Easy maintenance: quick and straightforward replacing of the gel cartridges. No oil spilling.

Installation areas

Environments of up to 60 sqm / 650 square feet / home / Small shops / Restaurants / Cafés / Bars / Dressing rooms / Smoking areas / Trade shows / Offices and Doctor's offices / Hair and Beauty Salons, Hotels, Spas, Wellness areas

Technical Specifications

Dimensions:	Diameter: 4.7" H: 4,3"
Weight:	1.3 lbs
Rated Voltage:	12 VDC
AC/DC Adapter:	100- 240V/50Hz-60Hz, 0,3 A
Speed:	Super High, High, Medium, Low
Power Consumption:	1.1 W

Warranty:

1 year from installation.

Usage of certified SCENTCOMMUNICATION scent cartridges is mandatory.
